Continuation of Substance of Interview including description of the general nature of what was discussed: Applicant has agreed to amend claims 1,12 and 28 to further define the claimed invention over the applied arts of record. Particularly, the claims now specify proxy server action under predetermined condition to block requests for checking new mails as opposed to other types of mail request, e.g., request for downloading mails. The claims are also amended to distinguish the proxy server of the invention over the use of conventional firewalls for blocking certain requests to the mail server.
